

1. INTRODUCTION

Leather cleaner is a highly effective blend of gentle cleaners and conditioners to remove everyday soiling. Ideal for regular use and is enriched with glycerine and lanolin.

SAS1033

2. WHERE TO USE

- On automotive leather upholstery.

3. WHERE NOT TO USE

- On materials other than leather.

4. BENEFITS

- Removes everyday soils from automotive leather upholstery.
- 3 in 1 action – cleans, rejuvenates and conditions.
- pH balanced to prolong leather life.
- Enriched with glycerine and lanolin.
- Pleasantly fragranced.
- Economical – dilutable up to 1:12
-

5. PHYSICAL PROPERTIES

Appearance	Clear pale yellow liquid
pH (10% aqueous solution)	8.5 +/- 1.0
Specific Gravity	1.035 +/- 0.015
Flammability, as supplied	Non flammable
Composition Data, as supplied	An aqueous solution of soap, surfactants, conditioners, pH stabiliser, colour and dye.
Viscosity	Low viscosity
Non Volatiles %m/m	5 -10%
Application Temperature	For use on cool surfaces, at ambient temperatures.

6. APPLICATION DETAILS

Dilute 1:12 with warm water. Apply foam to surface to be cleaned, so avoiding over-wetting. Agitate with soft brush or sponge paying particular attention to areas of heavy soiling. Wipe away with clean damp cloth.
