

1. INTRODUCTION

A highly active silicone emulsion formulated to protect and revive tyres. It has been designed to produce a natural gloss finish to restore tyres to 'as new' appearance.

SAS1043

2. WHERE TO USE

- This product is designed for use on the sidewalls of all domestic and commercial automotive road and off-road tyres. Can also be used on exterior plastic trim.

3. WHERE NOT TO USE

- On motorcycle and pedal cycle tyres
- On tyre treads

4. BENEFITS

- Durable long lasting silicone finish
- Leaves tyres looking like new
- Helps reduce surface cracking on tyre sidewalls.

5. PHYSICAL PROPERTIES

Appearance	White emulsion
pH	12 to 14
Specific Gravity	0.982 +/- 0.015
Composition Data, descriptive	An aqueous solution of silicone, surfactants, alcohol and fragrance
Viscosity	Low viscosity
Non Volatiles %m/m	15 to 25
Active content %m/m, as supplied	20 to 30
Flammability, as supplied	Non flammable
Application Temperature	For use on cool surfaces at ambient temperatures

6. APPLICATION DETAILS

Apply either by cloth or low pressure spray. Allow to penetrate and then wipe over surface gently to level and shine.
