

1. INTRODUCTION

A heavy duty silicone based gel cleaner and polish for internal and external automotive non-porous surfaces.

SAS1044

2. WHERE TO USE

- This product is designed for use on plastic or rubber trim on motor vehicles.

3. WHERE NOT TO USE

- On any area where increased slip would create hazards, i.e. steering wheels, floor pedals, rubber foot mats etc.
- On glass or clear plastics where smearing may occur.
- On surfaces likely to be painted.

4. BENEFITS

- Cleans and shines
- Concentrated
- Helps restore original appearances
- Fast acting gloss finish.

5. PHYSICAL PROPERTIES

Appearance	An emulsion gel
pH	7 – 9
Specific Gravity	0.980 to 1.000
Composition Data, descriptive	A viscous emulsion of silicone fluids, polymeric thickeners and wetting agents.
Viscosity	Viscous liquid
Non Volatiles %m/m	10 to 20
Flammability, as supplied	Non flammable
Application Temperature	Ambient temperatures

6. APPLICATION DETAILS

Shake container well before use. Apply using a clean lint free cloth. Wipe over the surface, buff as required.
