

FACT SHEET

Product Name	SAS Satin Finish Cockpit Shine
Product Code	SAS2015
Date	25/05/16
Supplier's name and address	SAS Attack, Gelderd Road, Leeds LS12 6NA

SAS Satin Finish Cockpit Shine dressing is one of the most scientifically advanced products on the market today for protecting all things Rubber and Plastic.

Unlike many other dressings, SAS Satin Finish Cockpit Shine produces a lasting satin look finish that repels soiling and staining; treated surfaces therefore stay cleaner for longer, reducing the need for regular maintenance.

It is ideal for all plastic, vinyl and rubber surfaces inside and out, and under the bonnet, regular use will prevent the drying, cracking and fading that often results from heat and overexposure of such surfaces to the sun's rays.

For use on engine bays - Clean and dry your engine bay first. Then spray SAS Satin Finish Cockpit Shine liberally over all surfaces and leave to dry. There may still be a few areas that need a quick wipe down with a short pile microfibre towel, but everything else will be dry to the touch and looking like new.

Interior surfaces and door seals - Spray SAS Satin Finish Cockpit Shine onto a applicator pad and then wipe down the surfaces to be protected lightly and evenly before allowing them to dry naturally. Do not be tempted to over-apply the product. Once dry buff with a microfiber if necessary.

We hereby confirm that the above product meets all the required manufacturing specifications and Quality Control procedures as implemented by SAS Attack.
